

Bond Projects Updates for Monday 8 July 2013

Community Center

- Sump pump housing set and ballasted with concrete.
- Insulation, storefront framing, and paper and lath installations continued.

View south into the McHale Room (left) and Main Entry. Orange paint marks the upcoming wall footing excavation. (20130702-0942)

Above: Scaffolding surrounds the future triple entryway into the preschool classrooms.
(20130702-0942)

Right: Storefront framing for the west side doors from the Preschool Rooms to the playground.

(20130702-1001)

A concrete seat-wall will surround the Hackberry tree – pier holes have been dug. (20130702-1007)

Looking up into the Perera Pavilion from the east end of the building. (20130702-1013)

Looking into the Perera Pavilion from the northeast corner of the events area.

The events entryway is out of frame off to the right.

(20130702-1013)

Events rooms entryway seen from the east. Entry into the building is from the north side of this enclosed space.

(20130702-1013)

The sump pump housing situated in its permanent location. This area is a future planting bed, so the equipment will be screened by plants.

(20130702-1014)

Pleasant Oaks Park

- Trenching for irrigation and storm drainage proceeded.

Trenching for irrigation main.
(20130702-0853)

Above: Irrigation trench along north end of baseball field, looking west.

(20130703-1347)

Right: Irrigation mains in baseball field.
